

bioMérieux, March 30th, 2018

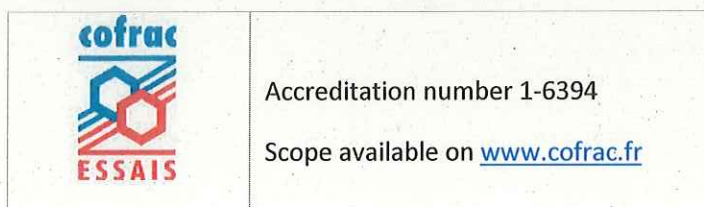

Dear Sir or Madam,

The Quality Control Laboratory of the Combours (France) manufacturing site is accredited by COFRAC in accordance with the international standard ISO / IEC 17025: 2005 for the realization of the control and performance of culture media - Ready to use solid and liquids according to standard NF EN ISO 11133.

This accreditation is an official third-party recognition of our technical competence and a guarantee of surveillance and compliance continuity of products.

The compliance with ISO 11133 appears on each **certificate of analysis**.

Accredited methods are listed in the scope available on www.cofrac.fr

The list of media covered by the accreditation and compliant with EN ISO 11133, is available on request at bioMérieux customer service.

This accreditation, in addition to the self-statement of full compliance with EN ISO 11133 (available at <http://www.biomerieux-industry.com/en-iso-11133-2014>) allows to justify the simplification of performance testing at reception of ready-to-use culture media.

For any reference to COFRAC accreditation, It is requested that the complete mention « bioMérieux SA has the accreditation N ° 1-6394. The scope of this accreditation is available on the COFRAC website: www.cofrac.fr », without reproduction of the accreditation mark (mail, product, service ...).

Our Customer Service is at your disposal to answer any questions you may have.
